

SOUND & STREAMING

Building Fund Project

Overview

Our building is a ministry tool. It's a home for all the Christian formation and activities that flow from our congregation. However, like all buildings, our space requires good stewardship over time. There are repairs and improvements that will help us continue to use this space well for Christ-centred worship, discipleship, and outreach. Starting in the spring of 2024 we are opening a new project in our building fund to go towards upgrading our sound and streaming equipment.

Our Worship Space

We've made some major improvements and upgrades in our worship space over the last decade: replacing our original pews with interlocking chairs, installing all new windows and carpets, and repainting the interior. We also completely redesigned our front platform to reflect our northern Ontario roots with natural elements of wood and rock, and a central anchoring wooden cross. That said: our current sound board is aging, some of our sound equipment no longer works, and our lighting is pre-LED and needs repair. In addition, we have been livestreaming our services—but with a fairly average video quality and often poor or nearly impossible-to-hear audio quality. We want to make an investment in sound and streaming equipment upgrades to renew our worship space and bolster our online outreach.

Donations

Donations marked 'building fund' will go towards this project. Please indicate 'building fund' in any cheque, e-transfer, or other form of donation. Any additional or unused amount will remain in the building fund for future projects or emergency building needs.

We will hold a congregational meeting after church on Sunday, Mar. 10th, for the church membership to vote to approve the project as a fundraiser for our building fund.

COST ANALYSIS

Sound Equipment			
Quoted through Cosmo Music Company Ltd.; Richmond Hill, ON.			
Quote submitted by Steve Henderson to DFGC Board; Approved by board to bring to congregation.			
	Qty	Item description	Cost
	1	Mixer Allen & Heath Avantis digital soundboard	\$17,775.00
